

MANUELL

# Testboxes

Multifunction Test Adapter Type MFA 2528
MFA 2528

**For function testing of assemblies and terminal equipment**

- Extremely flexible application possibilities as separate unit or economical solution as tandem unit.
- Capable of automation and integration into test station.

**Layout of system**

- This adapter can be integrated into virtually all ergonomically laid out workstations
- The specimen or component mount is equipped with pneumatic actuation in the drawer system
- The specimen mount and contacting unit can be converted quickly using the interchangeable set principle.
- Exactly parallel contact stroke through use of toggle lever mechanism
- Report printer located on unit

**Application examples:**

Telephone terminal equipment, answering machines, remote control, pocket calculators, control consoles, audio mixers, PC's, timers

**Technical Data**

|                              |               |
|------------------------------|---------------|
| Width:                       | 840 mm        |
| Height:                      | 355 mm        |
| Depth:                       | 500 mm        |
| Effective area:              | 250 x280 mm   |
| Upper stroke:                | 80 mm         |
| Lower stroke:                | 20 mm         |
| Insertion and ejection path: | Drawer 350 mm |
